Output Impedance:

TAPE RECORDER WITH FM/SW/MW/LW RADIO

-SAFETY PRECAUTION -

The following precautions should be observed when servicing.

- Since many parts in the unit have special safety related characteristics, always use genuine Hitachi's replacement parts. Especially critical parts in the power circuit block should not be replaced with other makers. Critical parts are marked with ▲ in the schematic diagram, and circuit board diagram.
- Before returning a repaired unit to the customer, the service technician must thoroughly test the unit to ascertain that it is completely safe to operate without danger of electrical shock.

DISASSEMBLY

1. Removal of Rear case

3. Removal of Main P.C.B.

3-1.

2. Removal of Cassette lid

3-2.

5. Removal of Deck chassis

5-1.

4. Removal of Volume P.C.B

5-2.

LUBRICATION

Lubricate one or two drops of machine oil rotating point or lubricate grease to sliding point.

Lubricate the respective parts below once every 1000 hours or once a year under normal conditions of use.

Avoid oiling then excessively, or rotation may become irregular because of oil splashes.

| | Lubrication point | Oil or Grease |
|---------------|-------------------------------|---------------|
| | Motor shaft bearing | Oil |
| Tape Recorder | Capstan shaft bearing | Oil |
| | Pressure roller shfat bearing | Oil |

INSPECTION

| Mode | İtem | Pressure or Torque |
|--------------|-----------------------------|--------------------|
| | Pressure of pressure roller | 350∼500g |
| Playback | Pressure of take-up roller | 130~250g |
| | Take-up torque | 35~60g·cm |
| | Supply reel back tension | 1.5∼3.5g·cm |
| Davidad | Rewind torque | 60∼90g·cm |
| Rewind | Take-up reel back tension | 6g cm or less |
| Fast Forward | Fast Forward torque | 65~90g·cm |

DIAL CORD STRINGING

ADJUSTMENT

Tuner

FM IF adjustment

1. Connection

2. Adjustment

| Genescope | Dial pointer position | Adjust | Reading | Remarks |
|------------------|-----------------------|------------|----------|---|
| 10.7 MHz Highest | | T204 | | Turn the T204 fully counterclockwise. |
| | Highest | T101, T203 | Maximum | fc : Specified centre frequency of the ceramic filter Reduce the level of the genescope so that the waveform will be one. |
| | | T204 | → | Adjust the T204 so that the output is like the S curve for symmetrical sinewave. |
| | | T203 | → | Adjust the T203 so that the straight line of the S curve can be achieved. |

FM RF (Covering and Tracking) adjustment

1. Connection

2. Adjustment

| | İtem | Signal generator Frequency Modulation | | Dial pointer position | | | Remarks |
|---|-----------------|--|--------------|-----------------------|--------|---------|---------|
| | Irem | | | | Adjust | Reading | |
| 1 | Covering | 87 MHz (For Germany: 87.5 MHz) | 400 11- 200/ | Lowest | L102 | | |
| 2 | Covering | 109 MHz (For Germany: 108 MHz) | 400 Hz 30% | Highest | CT102 | Max. | |
| 3 | Repeat 1 and 2. | | | | | | |
| 4 | Tracking | 90 MHz | 400 H- 200/ | 90 MHz | L101 | | |
| 5 | Tracking | 106 MHz | 400 Hz 30% | 106 MHz | CT101 | Max. | |
| 6 | Repeat 4 and 5. | | | | | | |

FM MPX (Multiplex) adjustment

1. Connection

2. Adjustment

| Adjust | Reading | Remarks |
|--------|---------------|---------|
| RT302 | 19 kHz±100 Hz | |

FM separation adjustment

1. Connection

2. Adjustment

| Signal generator | | Signal generator Dial pointer | | | | |
|------------------|---|-------------------------------|--------|---------|---|--|
| Frequency | Modulation | position | Adjust | Reading | Remarks | |
| 98 MHz | Audio (400 Hz) : 40 kHz dev. Pilot (19 kHz) : 6 kHz dev. | 98 MHz | RT301 | Min. | After making the signal of R channel and pilot, adjust it so that the output of L channel becomes minimum. Optimize RT301 so that the leak level of the L channel signal is equal to that of the R channel signal. | |

AM IF adjustment

1. Connection

2. Adjustment

| Gene | Genescope | | Adjust | Reading | Barnedo. |
|-----------|------------|--------------------------|----------------------|---------|----------------------------------|
| Frequency | Modulation | Dial pointer position | Adjust | Kedding | Remarks |
| 465 kHz | | Highest | T151 T152 T202 | Max. | Set the band switch to the "MW". |

SW RF (Covering and Tracking) adjustment

1. Connection

2. Adjustment

| | la | Signal generator Frequency Modulation | | Dial pointer | | | |
|---|-------------------|---------------------------------------|------------|--------------|--------|---------|---------|
| | ltem | | | position | Adjust | Reading | Remarks |
| 1 | 0 | 5.8 MHz | | Lowest | L154 | | |
| 2 | Covering 18.5 MHz | | 400 Hz 30% | Highest | CT154 | Max. | |
| 3 | Repeat 1 and 2. | | | | | | |
| 4 | - Tracking | 6.5 MHz . | 400 U- 200 | 6.5 MHz | L151 | T | |
| 5 | | 16 MHz | 400 Hz 30% | 16 MHz | CT151 | Max. | |
| 6 | Repeat 4 and 5. | | | | | | |

MW/LW RF (Covering and Tracking) adjustment

1. Connection

2. Adjustment

1) MW

| | h | Signal generator Frequency Modulation | | Dial pointer | A | Do andiana | Remarks |
|---|-----------------|--|--------------|--------------|--------|------------|---------|
| | ITOM | | | position | Adjust | Reading | Kemorks |

-Sicherheitsmaßnahmen

Bei der Wartung sind die folgenden Sicherheitsmaßnahmen zu beachten:

- 1. Da viele Einzelteile in diesem Gerät auch Sicherheitsfunktionen ausüben, dürfen nur Original-HITACHI-Ersatzteile verwendet werden. Besonders die kritischen Teile im Netzteil dürfen nicht durch andere Fabrikate ersetzt werden.
 - Die kritischen Teile sind im Schaltplan und in den Zeichnungen der Platinen mit dem Symbol A gekennzeichnet.
- 2. Vor der Auslieferung eines reparierten Gerätes an den Kunden, muß der Wartungstechniker das Gerät einer gründlichen Prüfung unterziehen, damit sichergestellt wird, daß absolut sicherer Betrieb ohne jegliche elektrische Schläge gewährleistet werden kann.

Précautions de sécurité -

Les précautions suivantes doivent être prises au cours

- 1. Etant donné que de nombreux organes de cet appareil possèdent des caractéristiques de sécurité, utiliser toujours des pièces de rechange Hitachi d'origine. Notamment, les pièces délicates du circuit d'alimentation ne doivent en aucun cas être remplacées par des pièces de marque différente. Les pièces délicates sont identifiées par le symbole "A" sur le schéma de montage et le schéma de plaque de câblage.
- 2. Avant de réexpédier l'appareil réparé au client, le technicien réparateur doit procéder à un essai de fonctionnement complet pour être sûr que l'appareil fonctionne normalement sans présenter de risque d'électrocution.

Schmierung

Rotationsteile mit einem oder zwel Tropfen Maschinenöl und Gleitteile mit Schmierfett schmieren.

Die unten gezeigten Teile alle 1,000 Betriebsstunden oder einmal jährlich schmieren, wenn unter normalen

Bedingungen verwendet.

Niemals zu viel Öl auftragen, da es durch verschüttetes Öl zu Schlupf an den Drehteilen kommen kann. Graissage

Appliquer une ou deux gouttes d'huile de machine au niveau des points de graissage ou mettre de la graisse a l'endroit coulissant.

Graisser les pièces citées plus loin une fois toutes les 1000 heures de fonctionnement ou une fois par an sous des conditions normales de fonctionnement.

Eviter de huiler excessivement car la rotation peut devenir irrégulière à la suite d'éclaboussures d'huile.

| | Schmierpunkte Point de graissage | Öl oder Fett Huile ou graisse | |

Note

- Voltage measured at base of chassis with minimum volume control and no signal. Die Spannung wird am Chassiseingang bei minimaler Lautstärke und ohne Ansgangssignal gemessen. Tension mesurée à la base du châssis avec un réglage minimum de la commande de volume et absence de signal.
 Nomenclature of Resistors and Capacitors. Benennung der Widerstände und Kondensatoren. Nomenclature de résistances et de condensateurs.
